

Q1 12. The method of claim 1 wherein the disposing step comprises placing the sample into a receptacle selected from the group consisting of a well plate, a block with holes or pores and a sheet with holes or pores.

Q2 21. The method of claim 1 wherein said generating step produces at least one form of the sample that is different than a known form of the sample.

Sub Bill 53. A method of screening a sample, said screening method comprising the steps of:  
Q3 disposing the sample on a plurality of capillary tubes;  
centrifuging the plurality of capillary tubes;  
solidifying the sample in the capillary tubes;  
analyzing the solids in the capillary tubes in a manner wherein the analytical result is indicative of form; and  
classifying each of the solids according to form.

#### **REMARKS**

Claims 1-55 are pending in the present application. Claims 1-55 were all rejected in the Office Action of July 1, 2002.

#### **Rejection of Claim 41 Under 35 U.S.C. §112, first paragraph**

Claim 41 was rejected under 35 U.S.C. §112, first paragraph, as lacking enablement in the specification. More specifically, the Office Action stated that the specification did not
